Body Tracking with **corevue**

The Corevue 360 is a professional scale, perfect for retail , physiotherapists, gyms, health centres and more. It uses Multi Frequency Bioelectrical Impedance Analysis, a safe and accurate way of providing insight into your customer's health. Among other things, it shows their body fat percentage, muscle mass, bone density and metabolic age. This allows it to deliver a full body composition analysis in as little as 15 seconds.

Corevue 360 Specification:

- Precision body composition
- Weighing capacity up to 270kg
- Intuitive user interface
- Cloud based multi-platform access
- 17" Portrait touch screen with advertising
- Coin / Note acceptance options
- Contactless card reader option
- Retail hardened internal electronics
- Online real-time usage reports
- Professional Weigh Scale

Train with **corevue**

Time to find out what you're made of

Corevue technology brings you fast, accurate body composition results using the latest advanced bioelectrical impedance analysis technology developed over the last 25 years. This gives you a true indicator of your inner health and, when monitored over time, can show the impact of any fitness regime or weight loss programme.

So, find out exactly what you are made of, set your goals and use Corevue to help you achieve your optimal fitness level and improve your health and wellbeing.

Every time you use Corevue your results are immediately displayed and also securely uploaded to the cloud to allow private monitoring or optionally sharing via social media.

Corevue can also integrate with other devices such as physical activity trackers to provide a more complete picture of overall health and wellness.

Body metrics include Weight, Height, Body Fat %, Total Body Water %, Muscle Mass, Physique Rating, Bone mineral Mass, Basal Metabolic Rate, Metabolic Age, Body Mass Index and Visceral Fat.

Corevue provides the perfect solution for public and private fitness, health and leisure operators as well as elite sports teams and universities. The flexible modular design allows for a wide range of customer payment methods from contactless card payment, cash and bespoke payment solutions such as membership and loyalty cards.
